# Why FOs could play more active participation in the Pacific agriculture development

## Advantages

- Pacific FOs tend to own 2 key capital investment assets- **Land and Labour**
- Most of land is customary tenure or registered under communal ownership
- Natural resources (forests, seas/reefs and Geo-environment attractions are communally owned
- Labour is relatively affordable and in abundance
- May strengthen communal coherence ,maintenance of good traditional values
- Economy of scale lead to high chances of viability
- Ideal for complying with niche – market (Organic, Fair-trade etc) requirements
- Cooperative collaboration may be appropriate at certain levels of the Value-chain

## Benefits

- Facilitate investment and strengthen linkages with the higher marketing/trading /value-chain
- May facilitate access to financial credit along the value-chain
- Pooling of resources (land, capital and labour)
- Rise of Savings Clubs
- Ensure focused support services to the FOs rather than thinly spread to individual HHs
- Enable FOs to venture into more sustainable businesses and self-reliance
- Create opportunities for self-esteem thru self-employment for members
- Immediate benefits to members
- Common Goods and community welfare can be facilitated

# www.pacificfarmers.com

The image displays the PIFON website interface and several overlapping PDF documents. The website features a navigation bar with links: HOME, ABOUT US, MEMBERS, NEWS, INFORMATION RESOURCES, PROJECTS, CONTACT US, and a search bar. The main header includes the PIFON logo and the text "Pacific Island Farmers Organisation Network". A large banner image shows a group of people in a nursery, with a text overlay stating: "Natural disasters are a reality for all Pacific Islands. Here PIFON members see firsthand the disaster mitigation strategies employed by nurseries in Fiji." Below the banner, a welcome message reads: "Welcome to Pacific Island Farmers Organisation Network".

Overlaid on the website are several PDF documents:

- UN Women Pacific Markets Literature Review 1st edition**: A document discussing markets and their role in providing income for women in the Pacific.
- Hot Picks**: A section highlighting key agricultural topics and resources.
- Member Publications**: A list of publications from member organizations, including:
  - Nature's Way Cooperative
  - Kasom Caden Association
  - Samoa Farmers Association
  - Farm Support Association
  - Taitel Taveuni
  - Tutu Rural Training Center
- Topics**: A list of topics related to organic agriculture, including:
  - Seed and planting material
  - Value adding
  - Organic sustainable agriculture
  - Value Chains
- Hot Picks** (continued): A section featuring various agricultural value chains and practices, such as:
  - Cocoa (Ghana) "Pruning"
  - WIBDI organic English
  - Organics in Samoa (in English language)
  - The raw material
  - Farming with compost in Africa
