

20XX CENSUS OF (Country Name)
Module B. Agriculture and Fishing Module

Question Number	Question	Anticipated response		Note
B1.	Has any member of this household conducted the following activities in the last 12 months? []	Response 1= yes 2= no		<i>Previous question on agriculture refers to the 'agricultural year'. I'm not sure there is an important distinction between 'last 12 months' and 'last agricultural year' in the Pacific. Particularly since enumeration will be done at a good time for the PHC not based on the agricultural year.</i> Reference period 12 months The different activities included in the list can be customised by countries according to their own interests and their choices in the supplementary module (if applicable).
	If 'yes', what is the <u>main</u> purpose?	Response	Purpose	
	Operated land for agriculture?	[]	[]	
	Grown food crops?	[]	[]	
	Participated in fishing activities?	[]	[]	
	Raising livestock?	[]	[]	
	Conducted aquaculture?	[]	[]	
	Hunting?	[]	[]	
Collection of forestry products?	[]	[]		
Production of handicrafts?	[]	[]		
B2. (Optional)	What is the total area of all the land used for agriculture purposes? []	Response (e.g., 1) a) Less than one rugby field b) 2-3 rugby fields c) 3+ rugby fields	Response (e.g., 2) a) < 0.5 ha b) 0.5–4.9 ha c) >5 ha	Only to be included if country wants a cut-off point for conducting a census of agriculture and/or will conduct the supplementary module. Units to be made country appropriate. NB land for 'agricultural purposes' should include land used for livestock raising and aquaculture etc. That needs to be clear for enumerators.

Note further questions on number of parcels comprising total land used for agriculture is considered too difficult for core questions in the latest FAO guidelines.
